Bespoke Brow Colour... E25

Microblading Eyebrow Embroidery

A relatively new, manual method which uses a precision hand held bladed pen. Pigment is implanted in the basal membrane which divides the epidermis from the dermis layer of the skin. This technique is more superficial than tattooing. Suits people who ideally have wrong brow shape, over plucked, loss of hair/patchy areas and won't grow back or medical reasons such as alopecia or chemotherapy.

Microblading including full consultation with patch test at least 48 hours before, a deposit of 50% will be taken at this time... E300

Top Up Treatment a second or even third appointment maybe necessary to reach the overall depth of colour or look your require... E150

Treatment Day... Numbing cream will be applied. All sterile equipment is used. Only EU regulated permanent Make-up quality pigments are used, specially manufactured for Micro Pigmentations. This treatment does not suit certain skin types... Excessive Sebum, Oily Skin, Broken Capillaries, Acne, Moles, Keratosis. Very Dry, Peeling or Problem Skin. Seborrhea Dermatitis. Keloid Scarring.
